The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/767,783	<b>Applicant(s)</b> HONJO ET AL.	
	<b>Examiner</b> Edward M. Johnson	<b>Art Unit</b> 1754	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 August 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group II in the reply filed on 8/2/07 is acknowledged.

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

The abstract of the disclosure is objected to because it contains the apparent computer file name, 469778\_1.doc, which should be deleted. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iida et al. US 6,638,485.

Art Unit: 1754

Regarding claim 5, Iida discloses a method for removing exhaust gas from mercury comprising adding a mercury chlorinating agent and ammonia to exhaust gas to convert the mercury to mercury chloride, passing to a NOx/ammonia reactor, and passing through a scrubbing tower.

Iida fails to disclose oxidizing mercury on the downstream side of the ammonia decomposition.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to oxidize mercury on the downstream side of ammonia composition because the reaction of mercury chloride and SOx is disclosed as being at the end of the process, which would motivate an ordinarily skilled artisan to oxidize mercury either at the beginning or on the downstream side of the ammonia decomposition, so long as it occurs before the scrubbing tower, as disclosed in Iida.

Regarding claims 6-9, Iida discloses the specific process conditions including ammonia levels and it would have been obvious to one of ordinary skill in the art at the time the invention was made to use optimal temperature zones of 120-450 degrees achieved through routine experimentation.
